

RIVERINE FISHERIES

From River to Feed: Nourishing Growth Naturally

PREMIUM MARINE PROTEIN SOLUTIONS

Leading manufacturer of high-quality fish meal,
fish oil, and fish solubles since 2011

**50+**

Respected and
reliable global clients

**12+**

Years of industry
experience

**15000MT+**

Annual fresh
meal production

Why Choose Riverine Fisheries?

Global Trust

Established partnerships with 50+ clients across 8 countries, built on reliability and consistent quality delivery.

Superior Quality

ISO 9001:2015 certified facility with HACCP compliance ensuring the highest quality standards in every product.

Innovation

State-of-the-art processing technology combined with sustainable practices for premium marine protein products.

Reliable Supply

Consistent supply chain management with 15,000+ MT annual production capacity ensuring timely deliveries.

Our Premium Products

Fish Meal

High-protein feed ingredient with 60-70% protein content for aquaculture and livestock.

Sterilized Fish Meal | **Steam Dry Fish Meal** | **Shrimp Head Meal**

Fish Oil

Premium marine lipids rich in Omega-3 fatty acids for enhanced nutrition.

Fish Soluble

Our dedicated quality control team ensures that every batch meets international standards through rigorous testing and certification processes.

Fish Meal

Premium Sterilized Fish Meal

The Gold Standard in Animal Nutrition

Finely ground, golden-brown powder delivering concentrated nutrition with 60-70% protein content

Why Choose Riverine Fisheries' Sterilized Fish Meal?

Riverine Fisheries' Sterilized Fish Meal is a finely ground, golden-brown powder feed ingredient made from carefully selected fish. It is produced under rigorous quality controls to ensure safety and consistency. Each batch delivers concentrated nutrition: very high protein, a full spectrum of essential amino acids, and valuable omega-3 oils. The result is a pure, nutrient-dense meal that can be readily blended into aquaculture, poultry, or pet-food rations.

Premium Sterilized Fish Meal Parameters

Parameter	Standard	Superior Grade
Protein	60% Min	60% - 70% Min
Sand/Silica	2% Max	2% Max
Moisture	8 - 10%	8 - 10%
Fat	8 - 10%	8 - 10%
Ash	25 Max	25 Max
Salt	2% Max	2% Max
TVN	120 Mg/ 100g	120 Mg/ 100g
Histamine	500 Mg / 100g	500 Mg / 100g
Packaging	50 KG HDPE Bag	50 KG HDPE Bag

Nutritional Excellence

Discover the powerful advantages of our premium sterilized fish meal

Why Choose Riverine Fisheries?

High Protein & Amino Acids

Our fish meal typically contains 60–70% crude protein, an exceptionally rich protein source. It provides a complete profile of essential amino acids to support muscle growth and health.

Abundant Omega-3 Fatty Acids

It is naturally rich in long-chain omega-3s (DHA and EPA), which are critical for immunity, brain development, and cardiovascular health.

Outstanding Digestibility

Fish meal proteins are highly digestible – often above 95% in aquatic and terrestrial species - so animals make the most of its nutrients. The lipids in fish meal are also easily digested by fish, poultry, pigs, and ruminants.

No Anti-Nutritional Factors

Unlike plant ingredients, our fish meal contains virtually no anti-nutrients (like phytates or tannins), ensuring full nutrient availability. This means minimal waste and maximum growth response in the animals that consume it.

Highly Digestible & Pure

Superior processing for maximum nutritional value

Riverine Fisheries' fish meal undergoes high-temperature cooking during processing, which coagulates proteins and effectively sterilizes the product. This eliminates pathogens and spoilage organisms while preserving nutrients.

The result is a clean, microbiologically safe ingredient. Because it lacks plant fibers and anti-nutrients, nearly all of its nutrients are bioavailable to the animal. Our fish meal has very high feed conversion efficiency: animals utilize almost every gram of protein and oil.

Sustainable & Reliable Supply

We source our raw material from abundant, managed fisheries. Globally, most fish meal is made from small, fast-growing marine fish (or bycatch of other fisheries) caught under strict quotas. In fact, studies note that most fishmeal comes from sustainably managed stocks, helping to prevent overfishing. FAO guidelines for responsible fisheries stress that processing should "maintain the nutritional value, quality and safety of the products" and "reduce waste"—principles we follow in our operations. By utilizing under-used fish and trimmings, we minimize waste and make full use of marine resources. The global fishmeal supply is stable (around 6–6.5 million tonnes annually), which means we can offer a consistent, year-round supply of Sterilized Fish Meal to our partners.

Why Choose Riverine Fisheries' Sterilized Fish Meal?

Riverine Fisheries' Sterilized Fish Meal is a finely ground, golden-brown powder feed ingredient made from carefully selected fish. It is produced under rigorous quality controls to ensure safety and consistency. Each batch delivers concentrated nutrition: very high protein, a full spectrum of essential amino acids, and valuable omega-3 oils. The result is a pure, nutrient-dense meal that can be readily blended into aquaculture, poultry, or pet-food rations.

Commitment to Quality & Safety

At Riverine Fisheries, quality and safety are paramount. Our production facilities operate under strict HACCP and ISO standards, with continuous monitoring to meet global feed regulations. Every batch is laboratory-tested for moisture, protein, ash, and contaminants (heavy metals, toxins and microbes) to ensure it meets rigorous specifications. We follow the FAO Code of Conduct in every step – processing "in a manner which will maintain the nutritional value, quality and safety" of the meal. This means you can trust our Sterilized Fish Meal to be free of harmful residues and consistent in nutrient content. We are committed to providing customers around the world with a safe, high-quality feed ingredient that they can count on, backed by transparent documentation and dependable supply chains.

Premium Quality
FAO Compliant

Fish Meal

Premium Steam Dry Fish Meal

Superior Quality Through
Advanced Processing

High-protein feed ingredient produced through
gentle steam drying for maximum nutrient retention

Why Choose Riverine Fisheries' Steam Dry Fish Meal?

Riverine Fisheries' Premium Steam Dry Fish Meal is a high-quality animal feed ingredient made from freshly caught Brown Jawla fish. Known for its rich nutritional profile, this meal is carefully processed to retain maximum protein, essential nutrients, and natural flavor, making it an ideal choice for poultry, aquaculture, and livestock nutrition.

Premium Steam Dry Fish Meal

Parameter	Standard	Superior Grade
Protein	50% Min	55% Min
Sand/Silica	2% Max	2% Max
Moisture	8 - 10%	8 - 10%
Fat	8 - 10%	8 - 10%
Ash	25 Max	25 Max
Salt	2% Max	2% Max

Histamine	500 Mg / 100g	500 Mg / 100g
Packaging	50 KG HDPE Bag	50 KG HDPE Bag

Key Benefits of Premium Steam Dry Fish Meal

Discover the exceptional advantages of our steam-dried fish meal

High Protein Content

With a protein concentration typically ranging from 50-55%, our steam-dried fish meal delivers the essential building blocks for muscle growth and overall health. This high-protein content is critical for animals that demand a protein-rich diet, such as fish, shrimp, poultry, and swine.

Balanced Amino Acid Profile

Our fish meal is packed with essential amino acids like lysine, methionine, and tryptophan, which are crucial for optimal growth, immune function, and efficient feed conversion. These amino acids cannot be synthesized by the body, making their dietary inclusion vital.

Rich in Omega-3 Fatty Acids

Our fish meal is naturally rich in omega-3 fatty acids (DHA and EPA), which support heart health, brain development, and overall immunity in animals. These fatty acids are also known to reduce inflammation and promote healthier skin and coat in pets.

High Digestibility & Palatability

Steam drying preserves the natural flavor and aroma of the fish, enhancing the palatability of feed. This leads to better feed intake and more efficient nutrient absorption, resulting in faster growth rates and better overall animal health.

Nutrient-Dense Formula

In addition to protein, our fish meal is a potent source of essential minerals and vitamins like calcium, phosphorus, iron, and vitamins A and D, supporting bone health, strong eggshells, and overall vitality.

Cost-Effective Nutrition

Compared to alternative protein sources like soy or plant-based meals, steam-dried fish meal offers a more concentrated source of protein and nutrients, helping farmers reduce overall feed costs while boosting animal growth.

Environmentally Sustainable

Our production process utilizes underutilized fish stocks and trimmings, reducing waste and supporting sustainable fisheries. By choosing Riverine Fisheries' fish meal, you're contributing to a more sustainable and responsible global food system.

Consistent Quality & Safety

Every batch undergoes rigorous quality control to ensure it meets international feed standards, making it a reliable choice for commercial feed manufacturers and livestock farmers worldwide.

Wide-Range Applications

Versatile nutrition solution for multiple industries

Aquaculture

Boosts growth rates, improves feed conversion, and enhances overall fish health in farming operations.

85% Growth Boost | **90% Feed Conversion**

Poultry

Promotes rapid weight gain, better egg production, and improved feed efficiency in commercial operations.

85% Growth Boost | **90% Feed Conversion**

Livestock

Supports muscle development, reproductive health, and optimal weight gain in cattle and swine.

70% Muscle Growth | **65% Weight Gain**

Pet Food

Provides superior nutrition for dogs, cats, and other pets, enhancing coat quality and overall vitality.

95% Coat Quality | **88% Palatability**

Quality, Consistency, and Sustainability

Choose Riverine Fisheries' Premium Steam Dry Fish Meal – where quality, consistency, and sustainability meet to support better animal nutrition and healthier farm yields. Our production process utilizes underutilized fish stocks and trimmings, reducing waste and supporting sustainable fisheries.

Fish Meal

Shrimp Head Meal

Premium Protein Source from Shrimp Processing

High-quality feed ingredient rich in protein, chitin, and essential minerals for optimal animal nutrition

Why Choose Riverine Fisheries' Shrimp Head Meal?

At Riverine Fisheries, we produce high-quality Shrimp Head Meal, a nutrient-dense animal feed ingredient crafted from the heads of freshly processed shrimp. This byproduct is a valuable source of essential nutrients, making it an ideal protein supplement for poultry, livestock, and aquaculture feeds.

Shrimp Head Meal

Parameter	Standard	Superior Grade
Sand/Silica	2% Max	2% Max
Moisture	8 - 10%	8 - 10%
Fat	8 - 10%	8 - 10%
Ash	25 Max	25 Max
Salt	2% Max	2% Max
TVN	120 Mg/ 100g	120 Mg/ 100g
Histamine	500 Mg / 100g	500 Mg / 100g

Superior Nutrition & Health Benefits

Discover the exceptional advantages of our premium shrimp head meal

Superior Protein Source

Contains 45-50% high-quality protein, providing the essential building blocks needed for muscle growth, strong bones, and overall health in animals.

Balanced Amino Acid Profile

Naturally rich in critical essential amino acids like lysine, methionine, and tryptophan, which are vital for optimal growth, immune support, and feed efficiency.

Rich in Natural Minerals

Packed with calcium, phosphorus, iron, and vitamins A and D, supporting robust skeletal development, egg production, and overall animal vitality.

Enhanced Digestibility

Shrimp head meal is known for its high digestibility, allowing animals to absorb more nutrients, leading to better weight gain and feed conversion ratios.

Palatability Boost

The natural flavor and aroma of shrimp can stimulate better feed intake, improving overall feed consumption and animal growth.

Immune System Support

Rich in bioactive compounds, shrimp head meal helps to boost immune function and reduce the risk of disease, promoting healthier livestock.

Environmentally Sustainable

Our production process utilizes underutilized fish stocks and trimmings, reducing waste and supporting sustainable fisheries. By choosing Riverine Fisheries' fish meal, you're contributing to a more sustainable and responsible global food system.

Cost-Effective Nutrition

Provides an economical protein source compared to other animal feed ingredients, helping farmers reduce overall feed costs.

Versatile Feed Applications

Ready to boost the performance and health of your livestock

Poultry Feed

Supports rapid weight gain, stronger bones, and higher egg production.

Aquaculture Feed

Enhances growth rates and feed conversion efficiency.

Livestock Feed

Promotes muscle growth and overall animal health.

Sustainability & Quality Assurance

Ready to boost the performance and health of your livestock? Choose Riverine Fisheries' Shrimp Head Meal – your trusted partner for premium animal nutrition. Our sustainable approach helps conserve natural resources and minimize environmental impact while providing cost-effective nutrition.

Premium Quality
Shrimp Head Meal

Fish Oil

Fish Oil

Premium Source of Omega-3

High-quality fish oil rich in EPA and DHA for optimal animal health and growth, promoting immunity and productivity.

Why Choose Riverine Fisheries' Fish Oil?

At Riverine Fisheries, we produce high-quality fish oil extracted from nutrient-rich fish, carefully processed to retain its natural benefits. Our fish oil is a potent source of omega-3 fatty acids, known for their critical role in supporting animal health, boosting immunity, and enhancing overall productivity in aquaculture and livestock feed.

Fish Oil

Content	Value
Acid Value	Less than 6 mg KOH/G
EPA	14-18%
DHA	6-9%
FFA	2-3%
Saponification	Value 190-200
Sediments	NIL
Moisture	Less than 1%
Impurities	NIL
Specific Gravity	0.90 Grams per milliliter
Antioxidant (Ethoxiquin)	As per customer request
Packaging	Flexi Bags, MS Drums, Plastic Drums

Premium Fish Oil Benefits

Discover the powerful advantages of our nutrient-rich fish oil

Rich in Omega-3 Fatty Acids

Contains high levels of EPA (Eicosapentaenoic Acid) and DHA (Docosahexaenoic Acid) – essential for healthy brain function, heart health, and reducing inflammation in animals.

Enhanced Growth and Feed Efficiency

Omega-3 fatty acids promote efficient nutrient absorption, improved feed conversion, and faster weight gain in fish and livestock.

Supports Immune Health

Contains natural antioxidants that boost the immune system, reducing the risk of disease and improving overall animal welfare.

Improved Fertility and Reproduction

Supports healthy breeding in aquaculture, leading to better hatch rates and stronger offspring.

Anti-Inflammatory Properties

Helps reduce inflammation, supporting joint and muscle health in livestock.

High Energy Source

Provides a concentrated source of digestible energy, reducing the need for additional fat sources in feed formulations.

Sustainable and Responsible Sourcing

Produced as a byproduct of fish processing, promoting a circular economy and reducing waste.

Versatile Feed Ingredient

Suitable for use in a wide range of animal feeds, including fish, poultry, swine, and pet food.

Fish Solubles

Fish Solubles

High-Quality, Growth-Enhancing Nutrition

Nutrient-rich liquid feed ingredient to accelerate animal growth and health

Why Choose Riverine Fisheries' Fish Solubles?

At Riverine Fisheries, we produce premium-grade Fish Solubles, a highly digestible, nutrient-dense liquid feed ingredient specifically designed to boost growth and enhance overall health in aquaculture and livestock. Our fish solubles are derived from carefully processed, nutrient-rich fish, ensuring a balanced profile of essential proteins, amino acids, vitamins, and minerals.

FISH SOLUBLE

PARAMETER	LIMIT	STANDARD
CRUDE PROTEIN	MIN	38%
CRUDE FAT	MIN	30%
MOISTURE	MIN	40%
TVBN	MIN	500 MG/100GM
PH AT PRODUCTION	MIN	5 TO 7
SALMONELLA	-	ABSENT/25G
TPC	MIN	105 CFU/GM

Key Benefits

Easily Digestible Formula

Our fish solubles contain short-chain peptides and free amino acids that are quickly absorbed by animals, promoting efficient nutrient uptake and rapid growth.

High-Quality Ingredients

Made from fresh, nutrient-rich fish, our solubles retain essential omega-3 fatty acids, vitamins (A, D, B-complex), and trace minerals, ensuring a balanced diet.

Natural Growth Promoter

Packed with natural growth factors and bioactive compounds that enhance feed efficiency, improve weight gain, and support overall animal health.

Immune System Booster

Contains bioactive peptides and antioxidants that strengthen the immune system, reducing disease risk and improving survival rates.

Palatability Enhancer

The natural flavor and aroma of fish solubles improve feed palatability, encouraging higher feed intake and better growth performance.

Versatile Application

Suitable for use in various feed formulations, including aquaculture, poultry, swine, and pet food. It can be used as a liquid supplement or sprayed onto dry feed pellets for enhanced nutrition.

Sustainable Production

Produced using environmentally responsible processes, making it a sustainable choice for feed manufacturers.

Applications

Aquaculture

Boosts growth and improves feed conversion ratios in fish and shrimp.

Poultry and Livestock

Provides essential nutrients for faster growth and improved immune function.

Pet Food

Enhances palatability and nutritional value for premium pet diets.

Consistent Quality in Every Batch

Riverine Fisheries is committed to delivering high-quality fish solubles that meet international feed standards, ensuring consistent quality and optimal performance in every batch.

Our Company

Riverine Fisheries is a leading manufacturer and exporter of premium fishmeal, fish oil, and specialized marine protein products, serving the global animal nutrition industry. With a focus on innovation, quality, and sustainability, we provide high-protein, nutrient-rich feed ingredients that power the growth of aquaculture, poultry, and livestock sectors worldwide.

Our Vision

At Riverine Fisheries, our vision is to be a global leader in the production and export of premium quality fishmeal and fish oil, creating sustainable value for our partners while supporting the growth and health of aquaculture, poultry, and livestock industries worldwide. We aim to set the benchmark for quality, innovation, and environmental responsibility, becoming the trusted choice for nutrition in every corner of the globe.

Our Mission

Our mission is to deliver superior marine protein solutions through innovative technology, sustainable sourcing, and unmatched quality standards. We are dedicated to empowering farmers and feed manufacturers with the highest quality, nutrient-rich products, ensuring optimal animal growth, improved feed efficiency, and better farm profitability. We believe in building lasting relationships with our partners, supporting their success through reliable supply, technical expertise, and personalized service.

Pioneers in Marine Nutrition

Riverine Fisheries stands at the forefront of the marine nutrition industry, driven by a commitment to quality and a deep understanding of aquatic and terrestrial animal nutrition. Our state-of-the-art production facility, located at MIDC Taloja, Maharashtra, is equipped with the latest technology to ensure the highest quality products, consistent performance, and maximum nutritional value.

Commitment to Quality and Sustainability

We take pride in our commitment to sustainable sourcing and environmentally responsible production. Our fishmeal and fish oil are derived from responsibly managed fisheries, ensuring minimal environmental impact and maximum nutritional benefit. Our production processes are optimized for quality, with strict quality control measures in place at every stage to guarantee the highest standards of feed safety and nutritional consistency.

Research and Innovation

At Riverine Fisheries, we work closely with a team of industry experts, nutritionists, and marine biologists to develop innovative feed solutions that enhance animal health and growth. Our products are designed to provide balanced nutrition, improve feed efficiency, and promote sustainable farming practices, making them the preferred choice for leading aquaculture and livestock farms globally.

Global Reach, Local Expertise

With a growing presence in international markets, including the Middle East, Southeast Asia, and beyond, Riverine Fisheries has built strong relationships with distributors and partners worldwide. This global reach, combined with deep local expertise, enables us to deliver customized solutions that meet the specific needs of our clients.

Our Leadership Team

Feroz Kasmani

Director & CEO

With decades of experience in the marine nutrition industry, Feroz Kasmani leads Riverine Fisheries with a clear vision for growth, innovation, and global expansion. His strategic mindset and passion for the industry have been instrumental in building a company known for its commitment to quality and customer satisfaction.

Faizan Kasmani

Director

Faizan Kasmani brings energy, insight, and operational excellence to Riverine Fisheries. His focus on efficiency, customer experience, and market expansion ensures that the company remains at the forefront of the global fishmeal industry. His dedication to continuous improvement and innovation drives the company's success.
